

# BS10 Earphones

## with Remote and Mic

Thank you for purchasing our Betron Earphones with Remote and Mic. To use the Betron Earphones with Remote and Mic, plug them into your device and insert the earphones in your ears.

### **Important Safety Information Avoid Hearing Damage**

**WARNING:** Permanent hearing loss may occur if earphones are used at high volume. Set the volume to a safe level. You can adapt over time to a higher volume of sound that may sound normal but can be damaging to your hearing. If you experience ringing in your ears or muffled speech, stop listening and have your hearing checked. The louder the volume, the less time is required before your hearing could be affected. Hearing experts suggest that to protect your hearing:

- Limit the amount of time you use the earphones at high volume.
- Avoid turning up the volume to block out noisy surroundings.
- Turn down the volume if you can't hear people speaking near you.

### **Keep Out of Reach of Children**

**WARNING:** The small parts included with this product can be a choking hazard. This product is not intended for use by small children and should be kept away from children under 3 years of age.

### **Do Not Use While Driving**

**Important:** Use of earphones while operating a vehicle is not recommended and is illegal in some areas. Check and obey the applicable laws and regulations on the use of earphones while operating a vehicle. Be careful and attentive while driving. Stop listening to your audio device if you find it disruptive or distracting while operating any type of vehicle or performing another activity that requires your full attention.

### **In Case of Skin Irritation**

Earphones can lead to ear infections if not properly cleaned. Clean the earbuds frequently with an antiseptic, such as isopropyl alcohol. If a skin problem develops, discontinue use. If the problem persists, consult a physician.

### **Avoid Electrostatic Shock**

When using headphones in areas where the air is very dry, it is easy to build up static electricity and possible for your ear to receive a small electrostatic discharge from the headphones. To minimize the risks of electrostatic discharge from the headphones, avoid using the headphones in extremely dry environments, or touch a grounded unpainted metal object before inserting the headphones.

To	Do this
Answer the incoming or end the current call. Play or pause the music.	Press the centre button.
Increase volume	Press the + button.
Decrease volume	Press the - button.
